Gastroscopy Special

Are you concerned that your horse may be suffering from stomach ulcers? The end of show season is the perfect time to diagnose them! Definitive diagnosis can only be made via endoscopy.

10% off Gastroscopy and sedation for the month of October

Ulcers in the squamous stomach

Pyloric ulcer

We get an in-depth look at the inside of your horse's entire stomach, including both the squamous and glandular regions, to check for any ulcers or abnormalities, and can then make informed treatment recommendations. Scope now to address any problems before the next competition season!

Call us to schedule your appointment! (503) 632-6336
